Message from the Guest Editor

This Special Issue aims to explore the impact of COVID-19 on the cardiovascular system and shed light on the clinical management strategies employed to mitigate cardiovascular complications in patients with long COVID.

COVID-19 has been associated with various cardiovascular complications, leading to increased morbidity and mortality in affected individuals. This Special Issue aims to focus on connecting experts in the field to present their latest research findings, clinical insights, and evidence-based recommendations related to cardiovascular complications in patients with long COVID. Additionally, preventive measures and strategies to mitigate the long-term cardiovascular effects of COVID-19 will be discussed. This Special Issue aims to provide a platform for communication between researchers and healthcare professionals so as to better understand and address the cardiovascular implications of long COVID, ultimately improving patient outcomes.

We look forward to receiving excellent reviews and articles from experts in the field and providing readers with valuable insights.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
