submissions:

25 December 2024

Message from the Guest Editor

Dear Colleagues,

Thyroid disease and nodules are exceedingly common, and technology has led the forefront in the recent evaluation, diagnosis, and management of thyroid nodules. Ultrasound has largely been responsible for this wave, but new research and the application of molecular analysis and cytopathology education have streamlined the evaluation of thyroid nodules. Long-term follow-up of thyroid cancer has also allowed clinicians and researchers to accurately predict which patients are best treated conservatively and which are treated more aggressively. While techniques such as radiofrequency ablation have offered some opportunity for nodule management, surgery remains the mainstay of the treatment of thyroid cancer. This may range from simple lobectomy to advanced resection of the laryngeal, esophageal, and tracheal structures with acceptable outcomes. We wish to provide the reader with an institutional overview of current diagnosis and management techniques.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
