Message from the Guest Editors

Dear Colleagues,

Thyroid cancer is the ninth most common cancer worldwide, with 567,000 new cases every year. Although the incidence of thyroid cancer has not increased significantly compared to 2018, thyroid-cancer-related mortality has risen from 3.8% to 4.2%. Therefore, there is an urgent need for recent research progress into the improvement of diagnostics and for the implementation of new treatment methods. The aim of this Special Issue is to present new insights and research progress in the clinical management of thyroid cancer. We would be pleased to receive interesting articles on different aspects of thyroid cancer. Both clinical and experimental studies are welcome. We hope to provide readers of our Special Issue with a broad understanding of these topics.

Professor Dr. Wei Cai

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
