Message from the Guest Editors

Dear Colleagues,

This Special Issue will highlight the current state of the art in terms of recent advances in thyroid disease, both in the benign and the malignant disease, and the related advancements in thyroid surgery.

We welcome original publications and reviews focusing on the clinical management of thyroid disease, such as the diagnosis and surveillance of patients with nodular disease, thyroid carcinomas and rare endocrine neoplasms, including genetic counseling for the personalization of diagnosis and treatment of advanced and non-advanced neoplasms, related to the progress in endocrine surgery. Over the years, new and innovative techniques have been developed, proposed and implemented in thyroid surgery; for example, endoscopic and robotic surgery and the transoral approach.

The aim of this Special Issue is to present cutting-edge and up-to-date techniques in thyroid surgery, thus setting the stage for future research and new innovative techniques in the field. We would like to hear how researchers have adapted these new technologies to their daily practices and the results of these.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
