Message from the Guest Editors

Transcatheter structural heart disease interventions represent a new branch of percutaneous treatments, covering a wide range of previously surgically treated or even not addressed cardiac diseases. Gradually, we are experiencing a technological revolution in structural heart disease management, with several new or improved devices specially dedicated to this field. Despite all these advancements, however, many questions remain without answer.

With this Special Issue, we aim to present the up-to-date status of Transcatheter Structural Heart Disease Interventions. We would like to invite researchers from all transcatheter structural intervention associated areas to submit original articles or reviews, sharing their expertise and knowledge on this appealing subject.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
