Message from the Guest Editors

Dear Colleagues,

The use of TAVR continues to grow rapidly, and this raises a number of questions and current unmet needs: accurate patient selection, biomarkers/prognostic factors, role of inflammation, impact of concomitant cardiovascular and non-cardiovascular disorders, quality of life and patient-reported outcomes, personalized device selection, new indications (bicuspid, aortic regurgitation, valve-in-valve), paravalvular leaks, access to coronary ostia, stroke and cerebral embolic protection devices, subclinical valve thrombosis, antithrombotic therapy, valve durability, etc.

This Special Issue aims to collect original articles, reviews, and other contributions on the current state and future developments of TAVR focused on these and other hot topics in the verge of a new era of an even more widespread use of TAVR that will cause an overall dramatic improvement in survival and quality of life for our patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
