submissions:

closed (20 December 2023)

Message from the Guest Editors

We invite you to participate in the second edition of the *JCM* Special Issue entitled “Transcatheter Structural Heart Disease Interventions: Clinical Update”.

Following the success of the first edition, with 13 articles published, covering a broad spectrum of heart disease interventions

(https://www.mdpi.com/journal/jcm/special_issues/Transcatheter-Structural-Heart-Disease-Interventions), we were encouraged to release this second edition. The main objective of this new edition is to provide other authors and centers with the opportunity to contribute and present their scientific work in the transcatheter heart intervention field.

Together, we know that we can make this second edition as successful as the first. We invite all interested authors to explore transcatheter structural heart disease intervention topics, such as aortic, mitral, and tricuspid valve diagnosis and management, left atrial appendage occlusion, atrial or ventricular septum defects, and so on. Both original research papers and comprehensive review papers are welcome.

an Open Access Journal by MDPI

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
