Oncology Center, European  
University, Limassol, Cyprus

Deadline for manuscript  
submissions:

**closed (15 October 2023)**

### Message from the Guest Editors

The introduction of modern diagnostic imaging methods such as metabolic tracers for positron emission tomography (PET) and multiparametric magnetic resonance (MR) is changing the landscape in the management of urological malignancies. The current indication of radiotherapy is based on the location and extent of the disease; consequently, the role of adequate imaging is crucial for the diagnostic assessment of the real tumor burden, especially in the era of the sub-stratification of the disease (localized, oligometastatic, and polymetastatic disease).

This Special Issue provides highlights on the role of modern diagnostic imaging in guiding and improving radiotherapy indications and clinical outcomes in urological malignancies. Other topics of interest for this Special Issue could be PET-imaging, MR imaging, prostate cancer, bladder cancer, MR-guided radiotherapy, radiomics, and oligometastatic disease.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
