Gemelli—IRCCS, Largo Agostino
Gemelli 8, Rome, Italy

Deadline for manuscript
submissions:

15 September 2024

Message from the Guest Editors

In this Special Issue, we aim to shed light on the multifaceted nature of pathological fractures, extending beyond oncological pathology. Our focus will encompass metabolic bone disorders, post-radiation therapy complications, infections, and rheumatic diseases, highlighting the diverse spectrum of pathological tissue fractures.

Understanding the mechanisms underlying these fractures is paramount, as they pose unique diagnostic and therapeutic dilemmas. The orthopedic community is constantly striving to refine its knowledge and surgical approaches to effectively manage these intricate cases. By examining the intricacies of pathological fractures, we hope to advance our understanding of their pathophysiology and improve treatment strategies.

We invite researchers, clinicians, and experts in the field to contribute their original research and perspectives to this Special Issue. We aim to create a comprehensive platform for sharing innovative techniques, novel diagnostic methods, and therapeutic interventions that can enhance patient outcomes.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
