Message from the Guest Editor

Dear Colleagues,

Among the major non-communicable global burden of diseases (GBDs) are cardiac diseases, stroke and cancer. One important issue about these diseases is their multifactorial risk factors and etiological pathologies. Key to understanding and treating them is identifying a factor that can influence several of the etiological processes that lead to these diseases. This Special Issue will apply knowledge from neuroimmunology and will focus on the vagal nerve, in order to progress the understanding, prediction and possible treatment of these GBDs. I invite you all to contribute to this Special Issue with a manuscript that examines the role of the vagal nerve in cardiac, cerebrovascular or oncological diseases. A contributing manuscript can examine the process of predicting the onset or prognosis of these diseases by vagal nerve activity, how the vagus may affect their underlying mechanisms or how it can treat these diseases. I hope that this manuscript will contribute to predicting and treating GBDs.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
