Message from the Guest Editors

Dear Colleagues,

The failure to properly diagnose and treat traumatic injuries to the maxillofacial complex may result in devastating quality-of-life outcomes. With post-surgical consequences that range from malocclusion to loss of vision, the academic and surgical expertise of the facial trauma surgeon is essential for this patient population. The enhancement of technology developed from the collaboration of surgeons, research scientists, and engineers has allowed for precise diagnosis and surgical planning. The results provided by these scientific efforts not only improve surgical outcomes but also have a positive socioeconomic impact on the hospital systems, such as shorter operating room times and hospital stays. This Special Issue will present the current concepts in the diagnosis and management of traumatic injuries to the face that are fundamental to providers involved in the treatment of fractures of the craniofacial complex.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
