Deadline for manuscript submissions:

closed (23 June 2024)

Message from the Guest Editors

Intestinal cancer, also known as colorectal cancer, is one of the leading causes of cancer-related deaths worldwide. Recent advances in the diagnosis and treatment of this disease have improved patient outcomes and increased survival rates.

Treatment options for intestinal cancer have also expanded, with a greater emphasis on personalized and targeted therapies. Surgery remains the primary treatment for early-stage disease, but advancements in surgical techniques, such as laparoscopic and robotic-assisted surgery, have improved outcomes and reduced recovery times.

In addition to these clinical advances, there have been significant strides in understanding the genetic and molecular mechanisms underlying intestinal cancer.

Overall, the advances in the diagnosis and treatment of intestinal cancer have significantly improved patient outcomes and hold promise for continued progress in the field. However, challenges remain.

The current Special Issue will focus on updated research that will address the existing challenges in the field, in order to further improve outcomes for patients with intestinal cancer.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
