submissions:

28 March 2025

Message from the Guest Editors

Dear Colleagues,

An evidence-based approach underpins and prompts change in modern surgical therapy. Driven by an improved understanding of the pathological basis of disease and its treatment alongside an imperative to improve outcomes, these changes affect all disciplines of visceral surgery. To complicate matters further, advancements in diagnostic and surgical technology have heralded changes in therapeutic indications, with the advent of modern medications greatly influencing how and when surgeons intervene. In this Special Issue, we welcome authors to submit papers on the emerging clinical trends in visceral surgery including foregut, hepatobiliary, colorectal, and trauma surgery. We look forward to receiving your contributions.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
