Message from the Guest Editor

Dear Colleagues,

There are many options for anesthetic management during surgery. While there is consensus on the importance of multimodal analgesia, and recommendations for early rehabilitation and the prevention of nausea and vomiting, the place of many techniques (pharmacological, including the use of opioids, non-pharmacological and follow-up) remains debated.

This Special Issue aims to cover remaining questions regarding the specific requirements of patient subgroups, innovative anesthetic techniques and descriptions of unmet needs after surgery, paving the way for future improvements. We particularly encourage the submission of patient-centered research results.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
