Dr. Debra Palmer

Head of Childhood Allergy and
Immunology Research, Telethon
Kids Institute, Perth, Australia

Deadline for manuscript
submissions:

closed (20 September 2019)

Message from the Guest Editors

In the last decade, there has been a rapid advance in our knowledge of the induction of oral tolerance for the prevention of food allergy. We now have evidence of allergen-specific prevention of food allergy by the early introduction of egg and peanut. Despite these gains in knowledge we also know that early allergenic food introduction does not prevent eczema, and some infants are not able to tolerate the early introduction of allergenic foods with reactions on first oral exposure. This has led to growing awareness for the need to explore a range of other strategies to prevent early on-set allergic diseases. Trials are underway to test a range of interventions, including skin barrier interventions, vitamin D, probiotic and prebiotic supplementation, and modification of maternal diet. There is also a range of other prevention options being explored that remain at the pre-clinical and observational stage or have been trialed in small numbers of participants. In summary, our knowledge of the induction of tolerance and immune modulation is growing, and there is now a range of possible interventions for the prevention of food allergy.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
