Message from the Guest Editor

Dear Colleagues,

Facial surgery represents a challenge for any surgeon due to functional and aesthetic outcomes. New frontiers such as computer-assisted surgery and new biomaterials in head and neck reconstructive surgery have changed facial surgery in terms of achieving more successful results for surgeons and patients. Furthermore, computer-assisted surgery, in particular using a CAD–CAM system, improves results in terms of predictability and accuracy in order to obtain a reduction in operative time and a better quality of life.

The aim of this Special Issue is to investigate new frontiers in facial surgery focusing on biomaterials and computer-assisted surgery.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
