### Message from the Guest Editors

Very recently, transcatheter aortic valve implantation (TAVR) has been reported to be superior to traditional surgical aortic valve replacement (SAVR), even in younger patients with low perioperative risk. In light of these findings, we expect a further expansion of the worldwide TAVR procedures. However, this also means that possible TAVR complications and their avoidance are becoming increasingly important. Additional knowledge about the underlying mechanisms of complications or factors leading to valve deterioration are crucial for any specific valve design or for optimization of the implantation procedure. New imaging techniques can help in the development and improvement of both. The further expansion of the TAVR procedure can only be successful if these gaps of knowledge can be filled with scientific evidence. In summary, the further expansion of TAVR indication worldwide is both an opportunity and a responsibility.

The present Special Issue aims to discuss and present future perspectives for transcatheter aortic valve replacement to accelerate the further development.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
