Message from the Guest Editors

Dear Colleagues,

The effective treatment of gynecological cancers is the rising problem globally. The introduction of new drugs such as bevacizumab, PARP inhibitors, or checkpoint inhibitors that target PD-1 or PD-L1 has changed treatment strategies while posing new challenges. The management of some of the side effects of these new drugs and the introduction of subsequent lines of treatment may be a problem. Finally, there are also unresolved issues around surgical and palliative treatment that must be addressed. For instance, more research is needed to identify successful strategies to prevent and screen for cancer, as well as on additional biomarkers that can predict response to planned therapy, on the management of side effects of treatment and on the improvement of quality of life, including through nutritional therapies. The scope of this Special Issue is to provide an overview of recent advances in the field of gynecological oncology and to set new research directions. Therefore, researchers in the field of gynecological cancer treatment are encouraged to submit an original article or review to this Special Issue (case reports and short reviews will not be accepted).

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
