Deadline for manuscript
submissions:

closed (25 November 2021)

Message from the Guest Editor

The wide spread of COVID-19 has had significant and negative effects on human well-being, but it has also had a negative impact on many important diseases. It has necessitated a major reorganisation of emergency care facilities to accommodate the additional workload anticipated with the rapid surge in critically ill patients with COVID-19. Previous reports have demonstrated a reduction in admissions for different conditions like acute coronary syndrome or decreased use of coronary procedures in various countries affected by the COVID-19 pandemic, leading to an increase in out-of-hospital deaths and long-term complications of myocardial infarction and missed opportunities to offer secondary prevention treatment for patients with coronary heart disease.

In this context, we do not know what impacts these events may have had in psychology and sexuality.

In this Special Issue, we invite researchers and clinicians to submit their works, including original clinical research studies, meta-analyses, and systematic reviews, that will provide additional knowledge on the impact of the COVID-19 pandemic on global diseases and human well-being.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
