Deadline for manuscript submissions:

**closed (1 November 2020)**

### Message from the Guest Editor

Dear Colleagues,

The incidence of diabetes is projected to double by 2030. Diabetes shows several associated alterations, including vascular dysfunction, neuropathies, as well as central complications. All nerve fibre types are adversely affected by diabetes and, in addition to glycemic control and duration of diabetes, conventional and non-conventional markers of macro- and micro-vascular disease are strongly associated with neurodegenerative changes. In this Special Issue, we are making a call to action to stimulate researchers and clinicians to submit their most valuable studies on neurodegenerative and neurovascular changes in diabetes. Original investigations, review articles, and research letters are especially welcome.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
