Message from the Guest Editor

Nonalcoholic fatty liver disease (NAFLD) is rapidly becoming the most common cause of chronic liver disease in Western countries and is likely to be the most common cause of liver transplantation in the coming years. The prevalence of NAFLD is very high (up to 60%) in patients with type 2 diabetes or obesity, especially in candidates for bariatric surgery. NAFLD has been strongly associated with Metabolic syndrome. However, there is growing evidence of a more complex pathophysiology in which pro-inflammatory pathways play a key role. Therefore, NAFLD can be considered a multisystem disease that requires multidisciplinary assessment.

The aim of this Special Issue is to address the multiple aspects of NAFLD as a new indication for liver transplantation, highlighting the impact of associated comorbidities and recent advances in optimal treatment and therapies for these patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
