Deadline for manuscript submissions:

closed (20 July 2023)

Message from the Guest Editors

Due to clinical and translational research, there has been a relevant improvement in the treatment of trauma patients in the last century. Progress in the outcome of these patients is associated with a better understanding of fracture healing, the development of implants for fracture fixation/joint replacement, improvements in surgical approaches, and treatment algorithms, among others. Nonetheless, there have also been changes in the characteristics of orthopedic trauma patients.

While orthopedic trauma surgeons were facing a high quantity of polytrauma patients and injuries associated with high energy traumata in the past, there has been a shift towards fewer multiple injured patients accompanied by an increasing amount of fragility fracture patients that suffer minor or no trauma.

Therefore, this Special Issue focuses on multifactorial changes and improvements in the treatment of orthopedic trauma and fracture care, aiming to provide a selection of current scientific and surgical recommendations for clinical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
