Message from the Guest Editor

Dear Colleagues,

Lifestyle habits (e.g., daily diet, activity level, smoking, alcohol consumption) strongly affect bone health, often resulting in reduced bone quality and stability. In combination with an increased risk for falls, this strongly increases the fracture risk. In the case of a fracture, its treatment (fixation of the fracture, handling of the surrounding soft tissue, patients' mobilization, etc.) represents a great challenge. Despite all medical progress, these patients still frequently face delayed or impaired bone healing rich in complications. This Special Issue should collect manuscripts that investigate the effect of lifestyle habits on fracture healing, reflecting our current knowledge and describing underlying molecular mechanisms that can provide novel diagnostic tools and treatment/therapeutic options.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
