Deadline for manuscript  
submissions:  
**closed (20 July 2023)**

### Message from the Guest Editors

Dear Colleagues,

“Structural heart disease” is any non-coronary cardiovascular abnormality, congenital or developed with aging, which weakens the heart’s structure. In the last few decades, many significant advances have been achieved in our understanding of the pathological mechanisms which underlie such conditions, and new diagnostic tools and treatment options have been developed.

The scope of this Special Issue is to provide an overview of the latest advances in structural heart diseases’ diagnosis and treatment. Therefore, researchers in the field of structural heart disease are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted).

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
