Message from the Guest Editor

Respiratory tract infection is one of the most common diseases encountered by physicians in clinical practice. Bacterial, fungal, or viral infections of the respiratory tract remain an important cause of death. Quick pathogen diagnosis, antimicrobial drug resistance, and new emerging infections comprise the major challenges faced by clinicians.

This Special Issue aims to focus on current research on community-acquired pneumonia, hospital-acquired pneumonia, bronchiectasis, tuberculosis, fungal lung infection, etc. We welcome articles on the latest diagnostic techniques, pathogenic microorganisms, drug efficacy, epidemiological analysis, and other clinical research, to provide evidence and thoughts for the prevention, diagnosis, and treatment of respiratory tract infection.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
