Message from the Guest Editors

The clinical management of ischemic strokes is a major public health issue. Stroke is one of the main causes of death, the first cause of acquired disability in adults and the second cause of dementia after Alzheimer's disease. Ischemic strokes due to large vessel occlusion (LVO) represent 30–40% of all ischemic strokes and are associated with the highest morbidity and mortality. LVO stroke management remains challenging in acute phase and in secondary prevention.

This JCM Special Issue dedicated to recent advances in the clinical management of ischemic stroke is an opportunity to provide new insights in LVO stroke management in acute phase, including secondary prevention. I invite you to contribute to this exciting Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
