Message from the Guest Editor

Dear Colleagues,

The diagnosis of preeclampsia (PE) and fetal growth restriction (FGR) continues to be challenging. Even though both syndromes share common causes, they do not necessarily occur together, especially when they manifest late in the third trimester. The purpose of this Special Issue is to highlight new diagnostic viewpoints, focusing on both the unborn and the mother and even on questions of social and environmental factors. Recent basic science findings, molecular mechanisms, clinical trials, sociological approaches, as well as findings following the application of artificial intelligence/machine learning methods are welcome. In terms of fetal programming, the findings are of great importance for the lifetime risks of the unborn and therefore for our entire society.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
