Message from the Guest Editor

Dear Colleagues,

The diagnosis of preeclampsia (PE) and fetal growth restriction (FGR) continues to be challenging. Even though both syndromes share common causes, they do not necessarily occur together, especially when they manifest late in the third trimester. The purpose of this Special Issue is to highlight new diagnostic viewpoints, focusing on both the unborn and the mother and even on questions of social and environmental factors. Recent basic science findings, molecular mechanisms, clinical trials, sociological approaches, as well as findings following the application of artificial intelligence/machine learning methods are welcome. In terms of fetal programming, the findings are of great importance for the lifetime risks of the unborn and therefore for our entire society.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
