Gastric Cancer: Clinical Challenges and New Perspectives

Message from the Guest Editors

Surgically determined treatment and care of gastric cancer has experienced development for more than 15 years. The implementation of neoadjuvant chemotherapy has led to substantial progress in surgical therapy and its early postoperative and long-term oncosurgical outcome. In addition, surgical specimens and tumor tissue have been better characterized step-by-step. From a surgical point of view, the surgical potential of recurrent and metastatic tumor growth (i.e., hepatic and peritoneal metastases) as well as prospects for palliative tumor resections have become of great interest in the surgical community. Furthermore, multi-modal treatment concepts as well as gender- and BMI-dependent specifics may be of particular interest with regard to patient-, diagnosis-, tumor tissue- and surgical treatment-associated characteristics (such as perioperative factors and parameters). All the mentioned aspects are potential topics of interest for this Special Issue. We invite the submission of papers focusing on: Evaluating original data; Summarizing and discussing available data by means of a meta-analysis, systematic or narrative reviews.

Guest Editors

Prof. Dr. Claus Schildberg
Prof. Dr. Frank Meyer
Prof. Dr. Aristotelis Perrakis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
