

Special Issue

Triggers of Suicidal Ideation: Multidisciplinary Approach

Message from the Guest Editors

This Special Issue welcomes field work and reviews of research studies focused on suicide, particularly the triggers for suicidal ideation, to understand the risk factors, contribute to the control of suicide attempts, and improve mental and emotional health. Due to its multidisciplinary nature, research on health promotion, educational guidelines for prevention, management of behavioral factors or unhealthy lifestyles, social, cultural, and philosophical approaches to suicidal behavior, risk factors, intervention, and treatment, and all work that helps to clarify suicidal behavior and suicidal ideation may also be presented. This will improve our understanding of this behavior and help to prevent it in the future. Potential topics for this Special Issue include (but are not limited to):

- Suicidal ideation;
- Suicide attempt;
- Assisted suicide;
- Autolysis;
- Public health;
- Prevention;
- Disease prevention;
- Euthanasia;
- Healthy lifestyles;
- Health promotion.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
