Special Issue

Advances in Schizophrenia and Related Psychotic Disorders

Message from the Guest Editors

This Special Issue welcomes original studies, systematic reviews, and meta-analyses on cutting-edge advances in psychotic disorders. We aim to explore new prodromal criteria for identifying early schizophrenia and related conditions, as well as novel antipsychotics targeting alternative neurotransmitter systems—such as lumateperone or cholinergic modulators—to improve efficacy and tolerability. We also highlight the emerging roles of neuroimaging and EEG/AI applications in diagnostic and prognostic assessments. Studies on intranasal esketamine in resistant depression with psychotic features, the impact of suicide risk, and comorbidity with personality disorders are highly welcome. Other relevant topics include genetic predictors, organic differential diagnosis, and the therapeutic use of TMS and ECT. We look forward to research that integrates pharmacological innovation with psychosocial/psychotherapeutic and structural interventions to advance future clinical care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
