Current Advances and Future Perspectives in Interventional Cardiology

Message from the Guest Editor

Interventional cardiology has undergone significant advancements over the past decades, with improvements in techniques, devices, and outcomes revolutionizing the management of cardiovascular diseases. The aging population, characterized by an increase in age-related cardiovascular conditions, is placing an increasing demand on interventional cardiology. Open communication in this area ensures a multidisciplinary approach to diagnosis, treatment planning, and post-procedural management, leading to better decision making and improved patient outcomes. Engaging patients in the dialogue is crucial. When patients understand their condition, treatment options, and the role of each specialist involved, they are better equipped to make informed decisions and adhere to treatment plans. This collaborative approach ensures that patients receive the best possible care tailored to their individual needs while supporting the continuous evolution of cardiovascular medicine. In this Special Issue, we present the current status of and future perspectives in interventional cardiology, with a focus on innovation and perspective as central to driving progress and shaping the future.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
