

Special Issue

Pharmacotherapy of Mental Diseases: Latest Developments

Message from the Guest Editors

I am pleased to invite you to contribute to the following Special Issue entitled “Pharmacotherapy of Mental Illness”, which aims to highlight recent advances and interdisciplinary approaches in the pharmacological treatment of psychiatric and neuropsychiatric conditions. Pharmacotherapy plays a crucial role in their management, but significant challenges remain, including treatment resistance, side effects, non-adherence to treatment and the need for individualized approaches.

This Special Issue aims to explore how pharmacotherapy, when combined with or used as an alternative to psy-chotherapy and brain stimulation techniques, can contribute to improved outcomes. We are particularly interested in research that supports novel interventions, enhances our clinical understanding of these diseases and promotes personalized treatment in mental illness.

We welcome the submission of both empirical studies and papers, and look forward to receiving your contributions to this important and timely collection. Sincerely,

Prof. Dr. Habil. Laura Nussbaum

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
