

## Special Issue

# Targeted Therapies and Clinical Outcomes for Ischemic Stroke

### Message from the Guest Editor

Our Special Issue on Targeted Therapy and Clinical Outcomes for Ischemic Stroke aims to provide a comprehensive overview of the latest advancements in targeted therapy research. The collection of articles in this Special Issue will focus on areas such as stroke pathogenesis, biomarkers for diagnosis and prognosis purposes, imaging technologies, as well as the development of new drugs and therapeutic approaches for ischemic stroke. We are seeking original research articles, reviews, and perspectives that showcase innovative techniques and strategies related to the prevention and treatment of ischemic stroke. However, please note that we will not accept mini-reviews or case reports in this Special Issue. Overall, this Special Issue provides an excellent opportunity for researchers, clinicians, and scholars to present their findings and share their insights on the latest developments in targeted therapy for ischemic stroke. We believe that this Special Issue will play a vital role in promoting progress in this field, and we look forward to receiving contributions from experts around the globe.
