Oral Surgery: Recent Advances and Future Perspectives

Message from the Guest Editors

Oral surgery is a continuously advancing field. Recent developments in surgical techniques, biomaterials, and regenerative approaches have significantly improved treatment outcomes, even in challenging clinical contexts such as atrophic jaws or medically compromised patients. Particular attention has been given to approaches to enhancing the predictability of surgical procedures through refined techniques for hard and soft tissue management. Minimally invasive approaches and evidence-based protocols are increasingly contributing to patient-centered care. Digital technologies, including 3D imaging and computer-assisted surgery, have significantly enhanced the precision of treatment planning, offering a valuable complement to traditional surgical techniques. For this Special Issue, we invite articles focusing on advances and future perspectives in oral surgery. Topics of interest include, but are not limited to, dentoalveolar surgery, the management of impacted teeth, implant dentistry, bone and soft tissue reconstruction, oral pathology, the surgical management of peri-implant diseases, and emerging surgical techniques.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
