Progress in Diagnosis and Treatment of Primary Immunodeficiencies

Message from the Guest Editor

Primary immunodeficiencies (PIDs) are a heterogeneous group of >400 disorders that are often associated with recurrent, opportunistic or severe infections and various autoimmune manifestations. Improved recognition of PIDs and advances in molecular diagnostics have led to a significant increase in the number of individual PIDs that are currently being recognized. Despite a significant expansion in our knowledge in recent years, there remain significant gaps in our understanding of their pathogenesis and potential treatments. The aim of this Special Issue is to present the most recent developments and future prospects on the diagnosis and treatment of this diverse groups of disorders.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
