Recent Clinical Research in Pediatric Spinal Surgery

Message from the Guest Editors

Pediatric spine surgery is a very specific field of interest, yet a pediatric spine surgeon deals with a vast field of pathologies: from spinal deformities to metabolic conditions, tumors and trauma. Recent years have seen a continuous expansion of our knowledge and our ability to intervene: the development of new techniques and new tools are enormously expanding our horizons. In particular, non-fusion techniques are joining traditional interventions and opening up exciting possibilities for the future. However, doubts and unresolved problems remain in choosing the most appropriate surgical strategies. Our guide must be clinical research, which can suggest new fields of application and help us reduce the incidence of complications and maximize the results of surgery. The articles in this Special Issue intend to present the most recent developments in clinical research in pediatric spine surgery applied to the various problems that surgeons face in daily practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
