Biliary Atresia: Aetiology, Diagnosis and Treatment

Message from the Guest Editor

Despite extensive clinical and basic research, we know very little about the aetiology and pathomechanism of biliary atresia (BA). The following aspects should be considered alongside individual health issues: first, early organ replacement is a multifactorial burden for the growing organism, and second, every patient who survives with their native liver relieves the limited availability of donor organs and benefits national health expenditures with economic savings. From that point of view, international and interdisciplinary strategies are mandatory, in as much as BA is a rare disease. Over the last several years, national and international initiatives have been established in order to improve screening, centralization, diagnosis, as well as surgical and adjuvant treatment protocols. One such initiative is the recently launched European rare diseases network “rare-liver”.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
