

## Special Issue

# General Orthopedic Surgery: Trends and Prospects

### Message from the Guest Editor

The field of orthopedic surgery is ever-evolving and makes up a diverse clinical specialty dealing with diseases of the bones, muscles, and joints, such as arthritis, trauma, soft tissue disorders, tumors, and much more. Because of the rapid progress in the understanding of diseases and the precipitous expansion of treatments in orthopedic surgery, there has been a trend toward subspecialization, and the “general orthopedic surgeon” is becoming more of a rarity every day. There are many regions of the United States (and indeed the world) where a significant need for the general orthopedic surgeon is still prevalent but goes unfilled. This Special Issue of *Journal of Clinical Medicine* will be aimed at new trends and treatments for common orthopedic conditions felt to be in the purview of the general orthopedic surgeon.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
