Fertility Preservation: Recent Developments and New Insights

Message from the Guest Editors

Since the birth of Louise Brown in 1978, assisted reproductive technology (ART) has become a mainstay of fertility treatment. Numerous technological advances have yielded improved success rates and enabled patients to cryopreserve gametes and embryos for future use. A growing body of literature supports the safety and efficacy of fertility preservation in certain patient populations. Given the increased utilization and rapid technological progress in the field of fertility preservation, the topic is ripe for study. This Special Issue focuses on recent developments and new insights in fertility preservation.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
