

## Special Issue

# Clinical Management and Epidemiology of HIV and Hepatitis Virus Co-infected Patients

### Message from the Guest Editor

People living with HIV are at a higher risk of contracting hepatotropic viruses, as these microorganisms share the same transmission route as HIV. Furthermore, treatment combinations and regimens, clinical management, and prevention strategies for hepatitis viruses differ between HIV co-infected and uninfected individuals. For all these reasons, liver-related diseases have been identified as the main cause of death among people living with HIV. In this Special Issue, we will examine recent innovations and advancements in the management of hepatitis viruses in people living with HIV, especially those related with therapy, prevention, and care. Moreover, we will address the best practices for hepatitis virus elimination in this population and changes in epidemiology and transmission worldwide, with the aim to recognize the progress toward viral hepatitis elimination by 2030, a goal established by the World Health Organization.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
