

Special Issue

Laryngopharyngeal Reflux: The Last Decade

Message from the Guest Editor

The aim of this Special Issue is to cover all new and emerging aspects of the diagnosis and treatment of laryngopharyngeal reflux (LPR) from the last 10 years, as well as to revisit older and more established ones.

Despite the huge amount of literature, the diagnosis and management of LPR remains controversial. Examples of topics include, but are not limited to:

- Diagnostic algorithms for LPR;
- Empirical treatment of LPR: Is it still a valid therapeutic option?;
- Pediatric LPR: What's new?;
- Vocal process granulomas: A reflux-related problem or a surgical one?;
- Reflux questionnaires: A search for better and easier to use approach;
- Beyond proton pump inhibitors (PPI) treatment for LPR.

Please submit your paper for consideration for this Special Issue before the deadline. An article processing charge will apply upon acceptance of your paper.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
