Cleft Lip and Palate: Current Treatment and Future Options

Message from the Guest Editor

Orofacial clefts are estimated to affect 1 in every 700 live births on average, with significant global variations in incidence and prevalence. Evolution in the treatment of cleft lips and/or palates has resulted in improved functional and aesthetic outcomes for affected patients. Nevertheless, it is well established that patients who do not receive appropriate or timely cleft care are at significantly increased risk for lifelong morbidity and sequelae resulting from the condition. With improved understanding of surgical anatomy, perioperative factors impacting patient outcomes, the importance of multidisciplinary treatment and access to care, cleft surgery education, and surgical technological advancements, the field is currently poised to refine and further optimize care for patients affected with clefts of the lip and/or palate more than ever. In this Special Issue, we welcome authors to submit manuscripts that address the current treatment of clefts of the lip and/or palate, as well as future directions in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
