

Special Issue

Recent Advances in Dental Implantology: Part II

Message from the Guest Editor

It is with great pleasure and satisfaction that I communicate to you the upcoming Boutique Special Issue: "Recent Advances in Dental Implantology: Part II", following the great editorial success of the first edition. Certainly, these challenges continue to fascinate us, and in this regard I would like to invite you to contribute to a second editorial project focused on a range of inter- and multidisciplinary topics aligned with the same common denominators: bone tissue, metabolism and histomorphometric determinants depending on impacting factors. We all know that the main objective of our daily clinical practice is to improve quality of life. As the of this Boutique Special Issue, it is my intention to gather the current research related to these topics, and work with some of the leading global experts in the field of dentistry.

Guest Editor

Prof. Dr. Daniele De Santis

Head and Neck Department, Department of Surgery, Dentistry, Pediatrics and Gynecology, University of Verona, Verona, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
