Urologic Neoplasms: Recent Advances and Future Perspectives

Message from the Guest Editor

Over the last decade, we have witnessed tremendous advancement in the field of urinary and male genital system neoplasms. On one hand, we have seen the introduction of new protocols for the treatment of malignancies, some of which recruit the patient's immune system to eradicate threats. On the other hand, robotic systems developed by various manufacturers have arrived on the market, facilitating precision in surgical maneuvers and, as a consequence, improving surgical and oncological outcomes. This Special Issue of *Journal of Clinical Medicine* will focus on advances in the surgical and medical treatment of various urological and male genital system neoplasms. Authors are welcome to submit original research and review articles on the medical and surgical treatment of urological neoplasms involving the prostate, kidney, ureter, urinary bladder, penis, and testes. Please click [here](#) to find more information.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
