Surgery for Pancreatic Cancer

Message from the Guest Editor

Pancreatic cancer is the most common highly malignant tumor of the pancreas. Surgical resection is the only possible cure for patients with pancreatic cancer. However, the initial resection rate is only 20% because the cancer has already metastasized or is in the locally advanced stage when it is detected. The proportion of patients with pancreatic cancer receiving neoadjuvant therapy is increasing each year. Traditional "surgery first" treatment strategy, which is appropriate for resectable pancreatic cancer, is now facing doubts and challenges, especially for locally advanced and borderline resectable pancreatic cancer. In this Special Issue, we will pay attention to a variety of surgical treatment strategies in pancreatic cancer, including preoperative and postoperative management (such as neoadjuvant chemoradiotherapy, the prevention of postoperative complications, nutritional supplement and other perioperative management), and methods to prevent postoperative recurrence and metastasis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
