

Special Issue

Physiotherapy in Temporomandibular Disorders and Headaches

Message from the Guest Editor

Temporomandibular disorders and headaches are conditions that cause high levels of pain and craniofacial disability and this makes therapeutic approaches to them more complex. In the last decade, research on physiotherapy treatments in patients with temporomandibular disorders and headaches has increased exponentially. Emerging research also demonstrates that multimodal physiotherapy treatments that include therapeutic education, manual therapy, and exercise are promising options to improve function and reduce pain and disability without producing significant adverse effects on these patients. For an upcoming Special Issue in the *Journal of Clinical Medicine* (PubMed indexed ISSN 2077-0383; IF = 5.688), we invite investigators to contribute original research articles (trials, cohort studies, case-control studies, and cross-sectional studies) or reviews of the literature (systematic reviews and meta-analyses or narrative reviews) that are of high quality and novelty and focus on the physiotherapeutic treatment of patients with temporomandibular disorders and headaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
