Special Issue

New Advances in Musculoskeletal Physiotherapy: Exercise, Manual Therapy and Invasive Physiotherapy

Message from the Guest Editors

Musculoskeletal disorders and traumatic injuries represent a significant global health burden, affecting millions of individuals and reducing their quality of life. Advances in physical therapy have played a crucial role in improving the assessment, treatment, and prevention of these conditions. Exercise-based therapies, manual techniques, and emerging invasive physical therapy approaches, including dry needling and percutaneous electrolysis, are showing promising outcomes in managing pain, enhancing function, and accelerating recovery. Despite these advancements, challenges remain regarding the optimization of treatment protocols, patient-specific interventions, and the integration of innovative technologies. This Special Issue will gather high-quality research and reviews exploring the latest developments in musculoskeletal and orthopedic physical therapy. We invite contributions addressing clinical applications, the underlying mechanisms, and outcome-based studies to further refine evidence-based practices and improve patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
