

Special Issue

Clinical Application of Established and Emerging Biomarkers for Cardiopulmonary Diseases

Message from the Guest Editors

With a worldwide prevalence of 7.4%, chronic respiratory conditions have a growing impact at all levels of economic and health systems, with relevant social costs and new healthcare needs in a population that is increasingly living longer. Using both clinical methods and laboratory analyses of biological matrices, an increasing number of biomarkers have been identified in order to improve the risk stratification and adequate monitoring of the pharmacological as well as rehabilitative therapies recommended in respiratory diseases. The Special Issue is aimed at collecting new evidence on the use of established and emerging biomarkers for chronic airway diseases, including severe asthma, chronic obstructive pulmonary disease, and interstitial lung disease. This article collection will cover original articles as well as high-quality reviews and research articles, and it will be open to clinical as well as functional studies disclosing new prognostic and diagnostic applications of existing and novel biomarkers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
