

## Special Issue

# Systemic Autoinflammatory Diseases—Clinical Rheumatic Challenges: 3rd Edition

### Message from the Guest Editor

Autoinflammation is an important new field for clinical and experimental rheumatology. Based on the underlying mechanisms, target therapies nowadays include cytokine inhibitors for IL-1 $\beta$ , IL-6, interferon-, and TNF-alpha. In the near future, we expect to improve management further by using novel or improved international classification criteria as well as established outcome measures. This will facilitate novel approaches and clinical trials. Several already active international registers will provide us with long-term data for efficacy and safety. This Special Issue welcomes all types of papers on the broad spectrum of the clinical characteristics, prognosis, pathophysiology, and treatment of autoinflammatory diseases. The goal of this Special Issue is to further raise awareness of autoinflammatory processes and to better separate them from well-established autoimmune diseases. It is clear that we have entered a new age in this complex field, as rheumatology is increasingly linked to immunology.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
